

HOSPITAL MANAGEMENT SYSTEM

ABSTARCT

The project "HOSPITAL MANAGEMENT SYSTEM" includes registration of patients, storing their details into the system and, also computerized billing in the pharmacy, and labs. The software has the facility to give a unique id for every patient and stores the clinical details of every patient and hospital tests done automatically. It includes a search facility to know the current status of each patient. User can search details of a patient using their id. We can enter to the project using a secret and unique username and password it is completely safe and in encrypted form. The project consists of 5 modules such as "DBA, RECEPTIONIST, DOCTOR, PHARMACY, LABORARTARY." This project gives a privileged position for the DBA he can control whole project. The interface is very user-friendly. The data are well protected for personal use and makes the data processing very fast.
